

## Inspire your students to follow David's footsteps by entering this year's Sanofi Biogenius Canada competition.

Last year, David He of Old Scona Academic won the top regional prize in Alberta for his project "Aging in Human Cells is Linked to BubR1 Expression."

The Sanofi Biogenius Canada (SBC) competition gives high school students across Canada the chance to pursue biotechnology research under the guidance of real scientists in real labs. Students choose a project that's meaningful to them, explore the practical applications of potential innovations -- and sometimes, in the process, help change the world.

Students will have the chance to compete with other high school students from their region and across Canada -- and if they're a finalist -- from around the world. Plus, the SBC competition gives youth the chance to win cash prizes, scholarships, and more!

*"From a very early age, some of the first books I began to read were science books about the natural world and space. These books were what introduced me to the world of STEM."*

DAVID HE  
REGIONAL WINNER, ALBERTA

## Get the word out.

Print, post, or forward the attached PDF poster about Sanofi Biogenius Canada to let your students know about this exciting opportunity.
