

## Inspire your students to follow Dennis's footsteps by entering this year's Sanofi Biogenius Canada competition.

Last year, Dennis Drewnik of Sisler High School won the top regional prize in Manitoba for his project "Comprehensive RNA profiling identifies novel blackleg resistance genes in canola."

The Sanofi Biogenius Canada (SBC) competition gives high school students across Canada the chance to pursue biotechnology research under the guidance of real scientists in real labs. Students choose a project that's meaningful to them, explore the practical applications of potential innovations -- and sometimes, in the process, help change the world.

Students will have the chance to compete with other high school students from their region and across Canada -- and if they're a finalist -- from around the world. Plus, the SBC competition gives youth the chance to win cash prizes, scholarships, and more!

*"The most astonishing part of my research was where I was able to put everything together and make a comprehensive model on the genetic interactions between these genes at the molecular level."*

DENNIS DREWNIK  
REGIONAL WINNER, MANITOBA  
3RD PLACE NATIONAL WINNER

## Get the word out.

Print, post, or forward the attached PDF poster about Sanofi Biogenius Canada to let your students know about this exciting opportunity.
