

# Inspire your students to follow Gavin's footsteps by entering this year's Sanofi Biogenius Canada competition.

Last year, Gavin Kerr of Colonel Gray High School won the top regional prize in the Atlantic Region for his project "A Novel Approach to Bacterial Isolation for Drug Discovery."

The Sanofi Biogenius Canada (SBC) competition gives high school students across Canada the chance to pursue scientific research under the guidance of real scientists in real labs. Students choose a project that's meaningful to them, explore the practical applications of potential innovations -- and sometimes, in the process, help change the world.

Students will have the chance to compete with other high school students from their region and across Canada -- and if they're a finalist -- from around the world. Plus, the SBC competition gives youth the chance to win cash prizes, scholarships, and more!

## Get the word out.

Print, post, or forward the attached PDF poster about Sanofi Biogenius Canada to let your students know about this exciting opportunity.
