

Gavin researched a new approach to bacterial isolation for drug discovery.

What will you discover?

*The discovery of new therapeutics can be facilitated by the discovery of new strains of bacteria. The general project aim is to develop a novel method for the isolation of bacteria that can be used for drug discovery.*

GAVIN KERR  
REGIONAL WINNER, ATLANTIC REGION

The SBC competition isn't like other science competitions: it allows you to design and propose your own biotechnology research project and work with real scientists in real labs to see it through. Plus, the SBC competition gives you the chance to win cash prizes, scholarships, and more!
