

Winnie explored the blood brain barrier's pathways with applications in acute respiratory distress syndrome and sepsis.

What will you discover?

During systemic inflammation, the expression of Podocalyxin is shown to be required in maintaining the integrity of the blood brain barrier (BBB). This study suggests novel pathways that maintain proper BBB morphology and physiology.

WINNIE XU

REGIONAL WINNER, BRITISH COLUMBIA

The SBC competition isn't like other science competitions: it allows you to design and propose your own biotechnology research project and work with real scientists in real labs to see it through. Plus, the SBC competition gives you the chance to win cash prizes, scholarships, and more!

Don't wait! Apply today!
