

What is Sanofi Biogenius Canada?

For over two decades, the Sanofi Biogenius Canada (SBC) program has nurtured young minds and fostered great talent for the future, challenging high school students to carry out groundbreaking research projects in the field of biotechnology.

Those who compete in SBC are paired with local mentors, giving students hands-on research experience in a professional lab setting.

Participants present their findings at regional competitions. Cash prizes are awarded and regional winners advance to the National stage, where they vie for the top spot and the chance to compete in the International BioGENEius Challenge at BIO International Convention – the largest biotechnology event in the world.

What is Biotechnology?

Biotechnology uses biological systems, such as bacteria, to create goods and services. While it's been around for thousands of years, our growing understanding of DNA has ushered this technology into an era of new discovery, resulting in endless possibilities for medical, agricultural and environmental applications.

Biotechnology is an \$86.5 billion industry, responsible for more than one million Canadian jobs. Already at 7%, it's expected to account for a full 10% of Canada's GDP over the next decade.
